PathToAdmit QA Report — Run 3

Oct 23, 2026 · @Sivakumar D

Summary

Do not ship this release: opening the activity builder crashes the app for every user, so no one can add or edit an activity.

Type	Critical	High	Medium	Low
Bugs	1	0	2	1
UX and data issues	0	0	0	1
Suggestions				3

- **Tested:** live site pathtoadmit.com in Chrome, as a new guest (blank portfolio) and as the sample family account (Jordan, 10th; Maya, 8th).
- **Fixed this release:** fake essay scores on short drafts, the 7-Day Chronicle count, the milestone grade label, and AI rewrites that dropped or blanked out real facts.
- **Blocked:** the crash stopped retesting 10 tracked items that need the activity builder (marked "Blocked" below).

Regression check

Of 27 tracked items, 17 are fixed or still fixed and 10 could not be retested because of the crash.

#	Previously reported	Status	Evidence this run
Run 2 BUG-01	"[#]" placeholder saved in a description	Blocked	Activity builder crashes
Run 2 BUG-02	Fake essay score on a 14-word draft	Fixed	"Seed note (136 more words needed for 100-pt rubric score)"

#	Previously reported	Status	Evidence this run
Run 2 BUG-03	7-Day Chronicle counted 2 days	Fixed	1/7 days after 1 entry
Run 2 BUG-04	Description with "[#]" counted as crafted	Blocked	Activity builder crashes
Run 2 UX-01	AI rewrite left known hours as "[#]"	Fixed	Fills "8 hrs/wk, 34 wks/yr" and asks the student to confirm
Run 2 UX-02	Smart Suggestion changed the student's punctuation	Blocked	Activity builder crashes
Run 2 UX-03	AI Polish added "seasonal"	Blocked	Activity builder crashes
Run 2 UX-04	9th grader labeled "6th Grade Explorer"	Fixed	"Level 1 — 9th Grade Explorer"
Run 2 UX-05	Activity memory auto-counted as an Essay Seed	Blocked	Edit activity crashes
Run 2 UX-06	AI rewrite dropped "State Championship 2x"	Fixed	Keeps every award and number
R1, R6, R10, R16	AI Polish, Smart Suggestions, quick-picks, step 3 defaults	Blocked	Activity builder crashes
R17	Activity memory counted on Journal page	Blocked	Edit activity crashes
R2–R5, R15	College data, test policy, selectivity tiers	Still fixed	12 schools checked; UC campuses test-blind; Stanford "High-Reach", Texas A&M "Likely"
R7, R8, R14	Class year, streak, wording	Still fixed	9th = 2030; "1 Day"
R9, R12	AI coach rewrites and audit grounding	Still fixed	See UX-06 above; but see BUG-03 below
R11	Sibling data leaking into export	Still fixed	Jordan 5 activities and slots #1–#5; Maya 2, no slots

#	Previously reported	Status	Evidence this run
R13	MIT auto-added to dream colleges	Still fixed	Only the 3 entered schools

Bugs

BUG-01 blocks the app's core task: logging activities.

ID	Severity	Screen	Steps	Expected	Actual
BUG-01	Critical	Add activity and Edit activity (all screens, all users)	Click "Add activity" on Overview, Colleges or the header, "+ Add new activity" on Activities, or the edit pencil on any activity card. Reproduced 6 of 6 times, as guest and signed in	The 3-step activity builder opens	Whole app replaced by "PathToAdmit encountered an unexpected issue". Console: Minified React error #310 (a hook called conditionally) inside `useMemo` in component `GC`, bundle index-q9BEHELG.js. Saved data survives a reload
BUG-02	Medium	Colleges, AI Admissions Coach	As a guest, log 1 State/Regional honor, then Run Full Admissions Audit	"1 academic honor"	"0 activities and 0 academic honors logged" (Honors page shows 1/5)
BUG-03	Medium	Colleges, AI Admissions Coach (sample account)	Jordan: intended major Robotics Engineering; Top 10 #1 Robotics, #2 STEM kits. Run audit	A robotics or STEM archetype, as in Run 2	"Music & Performing Arts & Peer Mentorship Leader"
BUG-04	Low	Colleges, AI Admissions Coach	Guest with 0 activities. Run audit	Advice to add a first activity	Strategic advice says to add numbers to "your primary Common App activity", which doesn't exist

UX and data issues

ID	Severity	Screen	Issue
UX-01	Low	Error screen	"Reload Application" lands on the marketing home page instead of the screen the user was on. The data is kept, but users may think their portfolio is gone

Suggestions

1. Before each release, open the activity builder once as a guest and once signed in. That 30-second check would have caught BUG-01.
2. In component `GC`, make sure every hook (`useMemo`, `useState`, `useEffect`) runs on every render, before any early `return` or `if`. React error #310 means a hook only runs some of the time.
3. The AI rewrite now adds "(8 hrs/wk, 34 wks/yr)" to descriptions. The Common App collects hours and weeks in separate fields, so this spends about 20 of the 150 characters on data the reader already sees. Consider leaving it out.

Screen-by-screen results

11 screens passed, 3 failed, and 3 were blocked by the crash.

Screen	Result	Findings
Landing page and sample portfolios	Pass	3 samples; slides 1/4–4/4
Grade selector and class year	Pass	6th 2033, 9th 2030, 11th 2028, 12th 2027
Family setup	Pass	Step 1 marked Done
Profile & GPA	Pass	30% to 60% complete after save
Add activity, steps 1–3	Fail	BUG-01 crash
Edit activity	Fail	BUG-01 crash

Screen	Result	Findings
Activities directory	Blocked	Loads, but no activity could be added to check totals
Journal	Pass	1 reflection, 1 Essay Seed, "1 Day"
Honors & Awards	Pass	1/5 slots
Milestones	Pass	1/7 days; "9th Grade Explorer"
Colleges: published data and tiers	Pass	12 schools checked; links go to official sites
AI Admissions Coach	Fail	BUG-02, BUG-03, BUG-04
Essay Studio	Pass	Short drafts get guidance, not a score
Application export	Blocked	Buttons present; no activity to export
Student isolation (sample account)	Pass	Jordan 5, Maya 2; no duplicate slots
Sign out	Pass	Guest view returns
Error recovery	Blocked	Only reachable through the crash; see UX-01
