PathToAdmit QA Report — Run 4

Oct 23, 2026 · @Sivakumar D

Summary

This release is ready: the activity-builder crash is fixed, 30 of 32 tracked items are confirmed fixed, and only 3 low-severity findings are new.

Type	Critical	High	Medium	Low
Bugs	0	0	0	1
UX and data issues	0	0	0	2
Suggestions				2

- **Tested:** live site pathtoadmit.com in Chrome, as the sample family account (Jordan, 10th; Maya, 8th) and as a new guest (blank portfolio).
- **Scope:** 17 screens and 12 college data pages; add and edit activity opened 4 of 4 times with no crash.
- **Not fully checked:** error recovery (no crash to trigger it) and coach advice for a portfolio with zero activities.

Regression check

Every item blocked in Run 3 now passes, including the 5 Run 2 builder bugs.

#	Previously reported	Status	Evidence this run
Run 3 BUG-01	Add or edit activity crashed the app	Fixed	Opened from Overview, Activities and edit pencil, guest and signed in
Run 3 BUG-02	Audit said "0 academic honors"	Fixed	"1 activity … and 1 academic honor"
Run 3 BUG-03	Robotics student labeled Music	Fixed	"Robotics Engineer and STEM Educator", 92/100

#	Previously reported	Status	Evidence this run
Run 3 BUG-04	Advice about a nonexistent activity	Likely fixed	Advice now names the logged activity; zero-activity case not retested
Run 3 UX-01	Reload after crash lands on home page	Not testable	No crash occurred
Run 2 BUG-01	"[#]" saved in a description	Fixed	"Fill in placeholder before continuing"; Next Step blocked
Run 2 BUG-04	Description with "[#]" counted as crafted	Fixed	Can no longer be saved
Run 2 UX-02	Suggestion changed the student's punctuation	Fixed	Original period kept
Run 2 UX-03	AI Polish added "seasonal"	Fixed	"performed at recitals"
Run 2 UX-05	Activity memory auto-counted as Essay Seed	Fixed	Counts as a reflection, 0 seeds until bookmarked
R1, R6, R10, R16, R17	AI Polish, suggestions, quick-picks, defaults, activity memory	Fixed	Facts only; music-only suggestions; clean org picks; impact "Not selected"; Journal counts the memory
All other earlier items (17)	College data, isolation, class year, streak, essay length, rewrites	Still fixed	Same evidence as Run 3; rewrites no longer add hours

Bugs

ID	Severity	Screen	Steps	Expected	Actual
BUG-01	Low	AI coach, activity rewrites	Description: "I play piano and take lessons every week. I performed at a few recitals; practiced 4 hrs/wk on repertoire & technique." Run audit	Rewrite keeps every fact; notes only real additions	Rewrite drops "weekly lessons", and its note says "Added 4 hrs/wk from your logged activity schedule", although the student already wrote it

UX and data issues

ID	Severity	Screen	Issue
UX-01	Low	Journal	A memory saved inside an activity counts as 1 reflection, but the streak still shows "0 Days" until a journal entry is written
UX-02	Low	AI coach, audit	Tells the student to start "quantifying your exact hours" when the activity already lists 4 hrs/wk and 32 wks/yr

Suggestions

1. Add an automated smoke test that opens Add activity and Edit activity on every release. The Run 3 crash reached production because no check opened that screen.
2. In the audit, compare the activity's stored hours and description before suggesting what to add, so advice never asks for data already entered.

Screen-by-screen results

15 screens passed, 1 had low findings, and 1 could not be triggered.

Screen	Result	Findings
Landing page and sample portfolios	Pass	3 samples; slides 1/4–4/4
Grade selector and class year	Pass	6th 2033, 9th 2030, 11th 2028, 12th 2027
Family setup	Pass	Step 1 marked Done
Profile & GPA	Pass	30% to 60% complete; only the 3 entered colleges
Add activity, steps 1–3	Pass	Placeholder check, clean suggestions, no default impact
Edit activity	Pass	Opens on the sample account
Activities directory	Pass	1 activity, 128 h
Journal	Pass	2 reflections, 1 seed, 1 day; UX-01
Honors & Awards	Pass	1/5 slots
Milestones	Pass	1/7 days; Wordsmith 1/3; 9th Grade Explorer
Colleges: published data and tiers	Pass	12 schools; official links; UC campuses test-blind
AI Admissions Coach	Pass with notes	BUG-01, UX-02
Essay Studio	Pass	Short draft gets "136 more words needed"
Application export	Pass	Starred activity in Slot #1; 4 export buttons
Student isolation (sample account)	Pass	Jordan 5 activities, slots #1–#5; Maya 2, none
Sign out	Pass	Guest view returns
Error recovery	Not run	No crash to trigger it
